Make Club: Design your own angry birds app screen.

Each screen design will become a level in the app.

Design Your Screen Canvas Background
- a canvas does not change during the game
- you can draw a launch pad between the 2 dots, but not a rubber band (bottom left),
- include any platforms for the pigs, but don't draw the pigs here
- blocks will not stop our birds

Draw some Sprites (Sprites are pictures that can move or change on the screen)

Bird before launch	Crashed Bird	Happy Piggy	Dead Piggy
